

SPEAKER INTRODUCTION (CME)
GEOFF BOND

Geoff Bond graduated with first and second degrees in applied sciences from London University in the 1960's. He spent many years living among primal peoples in Africa and other parts of the globe.

From his research on human origins, Geoff has become a recognized authority on what it means to be human in lifestyle terms. He is on the health panel of the UK think-tank “Reform”.

Geoff Bond’s message is scientifically rigorous and cutting-edge. Its conclusions, although surprising, are thoroughly documented in the scientific literature.

Geoff lectures regularly to CME audiences both in USA and overseas. Recently he was keynote CME speaker at the Antiageing Conference, London.

Geoff’s latest book, *Deadly Harvest*, [hold up copy?] is the reference work for lifestyle anthropology and the mastering of degenerative disease. A copy is in our library.

Please welcome your speaker today, Geoff Bond!
